WHAT IS CLAIMED IS:

J. 5	1 An isolated nucleic acid molecule encoding a differentially expressed prostate cancer antigen 3 (PCA3) mRNA containing an additional sequence between exon 3 and exon 4a, thereby giving rise to a long PCA3 mRNA.
المسلم	2. The isolated nucleic acid molecule of claim 1, wherein said additional sequence interrupts the open reading frame of a PCA3 protein, thereby yielding a truncated PCA3 protein
10 10 10 10 10 10 10 10 10 10 10 10 10 1	3 The isolated nucleic acid molecule according to claim 1, comprising a polynucleotide sequence at least 90% identical to a sequence selected from the group consisting of: (a) a nucleotide sequence as set forth in SEQ ID NO:1,
5 P P 20	(b) a nucleotiste sequence encoding a differentially expressed PCA3 polypeptide comprising the complete amino acid sequence in SEQ ID NO·3; and (c) a nucleotide sequence complementary to any of the nucleotide sequences in (a) or (b).
	4 The isolated nucleic acid molecule according to claim 1, wherein the molecule comprises the nucleotide sequence encoding PCA3 as set forth in SEQ ID NO:1
25	5 The isolated nucleic acid molecule according to claim 1, wherein the molecule encodes the polypeptide comprising the complete amino acid sequence set forth in SEQ1Q NO.3.

ON B

Jb 3 2 V	An isolated nucleic acid molecule consisting of 10 to 50 nucleotides which specifically hybridizes to a differentially expressed long PCA3 mRNA comprising an additional PCA3 sequence between exon 3 and exon 4a, wherein said nucleic acid molecule is or is complementary to a nucleotide sequence consisting of at least 10 consecutive nucleotides from said PCA3 sequence, as set forth in SEQ ID NO 4
10 mil and and dan and the first fir	7 A method of detecting differentially expressed PCA3 mRNA in a sample comprising: a) contacting said sample with the nucleic acid molecule according to claim 6, under conditions such that hybridization occurs, and b) detecting the presence of said molecule bound to PCA3 mRNA.
≒ 15	8 The method of claim 7, wherein a quantitation of a short
1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1 1	PCA3 mRNA with respect to said long PCA3 mRNA enables a determination of the malignant status of a prostate. 9. A kit for detecting the presence of differentially expressed PCA3 mRNA in a sample comprising at least one container
25	means having disposed therein the nucleic acid molecule according to claim 6. 10. A recombinant nucleic acid molecule comprising, 5' to 3', a promoter effective to initiate transcription in a host cell and the nucleic acid
	molecule according to claim 1.

molecule according to claim 10.

11. A cell that contains the recombinant nucleic acid

	12. A non-human organism that contains the recombinant
5	nucleic acid molecule according to claim 10.
	1
	13 A purified differentially expressed PCA3 polypeptide,
	comprising an additional sequence between exon 3 and exon 4a, which
	interrupts a PCA3 open reading frame, thereby shortening said PCA3
10	polypeptide, or an epitope-bearing portion therof.
	14 The purified differentially expressed PCA3 polypeptide
	of claim 13, comprising an amino acid sequence at least 90% identical to a
	sequence selected from the group consisting of:
15	(a) the amino acid sequence of the PCA3 polypeptide
	compnsing the complete amino acid sequence in SEQ ID NO.3, and
•	(b) the amino acid sequence of an epitope-bearing portion
	of any one of the polypeptides of (a) of (b).
20	15. An antibody having specific binding affinity to the
	polypeptide or epitope-bearing portion thereof according to claim 14.
	16. A method of detecting PCA3 in a sample, comprising:
	a) contacting said sample with an antibody according to
25	claim 15, under conditions such that immunocomplexes form, and
	b) detecting the presence of said antibody bound to said
	polypeptide.

		17 A diagnostic kit comprising:
		a) a first container means containing the antibody according
		to claim 15; and
		b) second container means containing a conjugate
	5	comprising a binding partner of said monoclonal antibody and a label
		,
		18. A hybridoma which produces the monoclonal antibody
		according to claim 15.
पित्रो वासी वासे कारी हैंगा वासे किसी पीत्रो हिंदी (स्टिंग स्टिंग स्टिंग स्टिंग स्टिंग स्टिंग	10	19. A method of reatment of prostate cancer in a mammal,
		comprising a modulation of a level of differentially expressed PCA3mRNA
11		such that the level of a first differentially expressed PCA3mRNA, wherein
		said first PCA3 mRNA comprises an additional sequence between exon 3
		and exon 4a, is superior to that of a second differentially expressed PCA3
5	15	mRNA, wherein said second PCA3 mRNA lacks said additional sequence.
וויינון וויינו וויינון וויינון וויינו		
		20. A method of diagnosing the presence or predisposition
u. Cj		to develop prostate cancer in a patien, said method comprising:
		a) taking a sanfple from said patient;
	20	b) determining the amount of differentially expressed PCA3
		or RNA or PCA3 protein in said sample, and
		c) diagnosing the presence or predisposition to develop
		prostate cancer in a patient wherein a presence of a long PCA3 mRNA or
		protein is indicative of a non-malignant state of the prostate, and a presence
	25	of a short PCA3 mRNA or protein is indicative of prostate cancer or
		predisposition to develop prostate cancer.
		. \

	,
	21 A method of staging prostate cancer in a patient, said
	method comprising.
	a) taking a sample from said patient,
	b) determining the amount of differentially expressed PCA3
5	RNA or PCA3 protein in said sample, and
	c) staging prostate cancer in said patient wherein an
	increase in a level of a short PCA3 mRNA or protein is correlated with an
	increase in the malignancy of prostate cancer.
